Mariapia Martino CV Profile (English)

Mariapia Martino holds a Bachelor's degree in Communication and Design from Politecnico di Torino (1997). Since 1992, she works at the Energy Department "Galileo Ferraris" of Politecnico di Torino, where she currently serves as the **Head of Communication and Social Media** for the Energy Department, overseeing strategic communication, digital outreach, and public engagement activities. In addition, she is the **Coordinator of International Education Programs**, managing Erasmus initiatives and the InnoEnergy educational portfolio.

In addition, she collaborates with multiple research groups within the Department, supporting the development of innovative tools for learning, training, and teaching in the energy field.

Her research interests focus on energy efficiency in urban environments, user training for energy saving and sustainability, energy transition, and the training and communication of scientific results in the field of energy to diverse audiences. She has participated in European initiatives on education and training in the energy sector and has contributed to working groups such as the **DHC+ Education and Training Working Group** and the **ETIP SNET WG4 on Digitalization and Customer Participation**. She participated to many different EU funded projects, in the field of energy and green transition, including the automotive sector.

She is the author of around 30 scientific contributions, including conference papers, journal articles, and book chapters. The full list of papers is available at: https://iris.polito.it/cris/rp/rp05993
