ICRERA 2026

15th INTERNATIONAL CONFERENCE ON RENEWABLE ENERGY RESEARCH AND APPLICATIONS

Email : kamel.ouari@univ-bejaia.dz

Paper ID : 516
Paper Title : Robust Predictive DTC of a Dual-Star Induction Machine for Wind Energy Conversion Systems

Biography

Kamel Ouari was born in Béjaïa, Algeria, in 1970. He received the State Engineer degree in 1994, the Magister degree in 1998, and the State Doctorate degree in 2013. Since 2004, he has been a researcher and university lecturer at the University of Béjaïa, Algeria.

His research activities mainly focus on the control of electrical machines and static converters. His main research interests include the modeling, analysis, control, and optimization of electrical machines, as well as the development and control of power electronic converters.
